**CONVEYOR ROLLERS
TAPERED STYLE**

Blind bore tapered rollers are ideal for light to medium duty gravity roller curves used in corrosive, wash down or food handling environments. To order these rollers specify the material the roller is to be manufactured from, the outside diameter of the large and small end of the roller, the between frame dimension and the ball screw size.

Spring loaded or pin retained tapered rollers are ideal for medium to heavy duty gravity roller curves used in corrosive, wash down or food handling environments. To order these rollers specify the material the roller is to be manufactured from, the outside diameter of the large and small end of the roller, the between frame dimension and the shaft size and material type.

Special components and materials are available upon request, please consult BNB for further information.
